Barometer	
Barometer reading (without correction to mean sea level or for instrumental error)	(in 0.1hPa unit)
Location of barometer in your ship	
Outboard air temperature	(in 0.1 °C unit)
Time of reading (at the exact hour)	(YYYYMMDDHH in UTC)
Height of barometer above sea level (The present height is usually between "in ballast" & "at full load")	In ballast – At present – At full load –

Applicant Details	
Name	
Post/Rank	

Please send the completed form by Fax /E-mail to the Hong Kong Observatory :

Fax: (852) 23024521

E-mail: hkopmo@hko.gov.hk

General Guide for taking the barometer reading:

- The window or door of the house should keep open while measuring outboard air pressure.
- Avoid strong winds always.
- Read the barometer at the EXACT HOUR.
